## Message from the Alumni Association President:

Greetings from the Alumni Association:

I hope you all are having a good summer. If any alumnus living in the northeast needs information on heat survival from colleagues in the south or southwest, I'm sure we can arrange consultation. Your choice – dry heat or humidity – hopefully, there will be a break in the brutal temperatures soon.

Please join the RWJF ENF Alumni in productive and meaningful activities over the coming months:

Watch your e-mail in the coming weeks for the release of the ballot for the **2010 election for the Alumni Association Board of Directors**. IN ORDER TO VOTE, YOU MUST BE A CURRENT MEMBER OF THE ASSOCIATION. If you renew your membership by July 30, 2010 you will be able to cast your vote.

If you have not done so already, please go to the following link and **renew your membership in the ENF Alumni Association**: <http://www.acteva.com/booking.cfm?bevaaid=129918> Over the coming year, we will be rolling out new programs and web-based services to energize and connect alumni across the country. We want each and every one of you to participate.

Thank you to all of you who completed the **Alumni Survey conducted by the Center for Creative Leadership (CCL)**. CCL was very impressed with the 84% return rate on the survey! The survey results will be utilized to customize future alumni events, meetings, and services. Your input is essential to assure data-driven decisions by CCL and the Alumni Association Board of Directors.

The **transition of the RWJF ENF Program** from the Center for the Health Professions at UCSF to the Center for Creative Leadership continues to proceed smoothly. Both outstanding organizations are working collaboratively to assure a well coordinated transition. Meetings, conference calls, site visits and other activities are ongoing to assure continuity, relevance, and innovation in future programming for Fellows and Alumni. Staff from UCSF and CCL are working tirelessly in this transition process. The ENF Alumni Board is actively engaged with transition planning. Dennis Sherrod and I have met with CCL staff to provide the Alumni perspective on recruitment, curriculum and design, and Alumni development needs. Dennis has made himself available over the summer to work directly on alumni issues with CCL at their North Carolina site. I represent Alumni on monthly transition conference calls and the full Board is scheduled to meet in-person with CCL during the ENF seminar in Irving, TX in October.

Over the coming months, you will be asked to help **recruit an outstanding 2011 cohort** for the Fellowship. Recruitment/application materials are currently undergoing approval at RWJF and will be officially released in January 2011. Both UCSF and CCL are making presentations about the ENF Program at national conferences thru the summer and fall to maximize recruitment efforts. Please help identify good candidates and refer them to the CCL team for follow-up. You will receive notice when the 2011 applications are available.

Thank you for your support of the ENF Program. Please continue to participate actively in alumni activities. **Demonstrating solidarity in support of our ENF national leadership network has never been more important than it is today.**

Enjoy the remainder of the summer. Take time to renew.

Marcella McKay, President, Alumni Association

### **RWJF Health & Society Scholars Releases Call for Applications**

[Robert Wood Johnson Foundation Health & Society Scholars](#)

Application Deadline: October 1, 2010

The Robert Wood Johnson Foundation Health & Society Scholars program provides two years of support to postdoctoral scholars at all stages of their careers to build the nation's capacity for research and leadership to address the multiple determinants of population health and contribute to policy change. The program is based on the principle that progress in the field of population health depends upon multidisciplinary collaboration and exchange. Its goal is to improve health by training scholars to: investigate the connections among biological, genetic, behavioral, environmental, economic and social determinants of health; and develop, evaluate and disseminate knowledge, interventions and policies that integrate and act on these determinants to improve health.
